

What Every Business Should Ask About Its Waste Disposal Practices

- Does our company care where or how our waste is disposed?
- Is the facility where our waste is delivered permitted by the PA Department of Environmental Protection?
- What are our liabilities if our waste is disposed and there is no record of any facility receiving this waste?
- Does the facility which receives our waste actually have a record of receiving our waste? Have we ever checked on this?
- Do we receive records of our waste deliveries from the disposal facility? Is our company listed as the origin on these records?
- If a program exists where we would receive documentation of receipt of our wastes directly from the disposal facility, would this be an advantage for our company?
- If we could pay the disposal facility directly for waste disposal and receive a rebate per ton from the facility for waste delivered, would this be a cost savings over current practice?

Ask these questions of yourself and of your company.

If you are a Lebanon County business and are concerned about the answers, contact the Greater Lebanon Refuse Authority at (717) 867-5790 Ext. 317.
